

# CARNILOVE

*into the Wild*

**GRAIN-FREE  
& POTATO-FREE**

*"Return to the Wild  
and show your  
respect for the origin  
of dogs, for yourself,  
and for nature."*

Carnilove

# *into the Wild*

**Carnilove has been formulated with  
respect for the natural origins of dogs.**

The wide spectrum of carefully selected **wild-origin meats**,  
such as reindeer, duck, pheasant, turkey, lamb, wild boar, and salmon,  
**corresponds to the composition of natural prey** and ensures  
intake of important amino acids.

**Forest fruits, vegetables, wild berries, and herbs**  
are natural sources of important vitamins, antioxidants,  
and other essential nutrients.

Because grains are not a part  
of the natural diet of wild dogs,  
**Carnilove is entirely grain-free.**

The earliest record of cohabitation between dogs and humans dates to roughly 12,000 BC. In coexistence, the composition of the canine diet began to resemble the composition of the human diet, and especially with the advent of agriculture, it moved even further away from the dog's anatomical and genetic disposition.

We've designed Carnilove with careful consideration for the historical continuity of cohabitation between dogs and humans. The ingredients and their proportion have been developed according to the diet of dogs prior to the advent of agriculture, but production is based on the latest processes and technologies.

Because grains are not a part of the natural diet of wild dogs, Carnilove is entirely grain-free.

• GRAIN-FREE • POTATO-FREE •  
WILD-ORIGIN MEATS  
FOREST FRUITS  
VEGGIES & HERBS

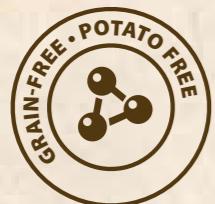

#### SALMON OIL RICH IN OMEGA-3 FATTY ACIDS

Salmon oil is a natural part of the Carnilove formulas. It is a rich **source of omega-3 unsaturated fatty acids**, which **support nervous and cardiovascular system health**, contribute to **quality skin and hair**, and have a positive effect on many other bodily functions. The oil in Carnilove comes from Scottish salmon and contains high levels of **DHA and EPA**, both of which improve mental and learning capabilities.

#### WILD-ORIGIN MEATS

Meat and other animal tissues are **sources of proteins**, the building blocks of muscle. It is very important to ensure that dogs have the **required daily intake of quality proteins**. The wide spectrum of carefully selected and unique sources of proteins in the Carnilove formulas, such as **reindeer, duck, pheasant, turkey, lamb, wild boar, and salmon**, respect the natural dietary choices of wild dogs. All of the meat and animal ingredients in Carnilove are selected with the greatest possible emphasis on quality and come **from regulated farms in the Czech Republic, Germany, Sweden, Scotland, Norway, and Australia**.

#### GRAIN-FREE \* POTATO-FREE

Grains are a common ingredient in commercial dog foods, where they serve as a cheap filler and source of energy. They do not, however, form a natural part of the canine diet. **Because dogs can't use the excess energy contained in grains and potatoes, it is stored in the body as fat and leads to the onset of obesity and related illnesses, such as diabetes.** Carnilove is a return to the natural food sources of wild dogs. Therefore, it contains no common grains or potatoes.

#### BREWER'S YEAST, PSYLLIUM AND YUCCA SCHIDIGERA

A combination of potent natural substances to **support digestion**, increase the usability of nutrients in the body, and provide necessary insoluble dietary fiber for a healthier digestive tract. Brewer's yeast also acts a **natural antiparasitic**, while yucca has a **positive effect on metabolism** and reduces the volume and odor of stools.

#### FOREST FRUITS, VEGETABLES & HERBS

Fruits, vegetables, and herbs are a common and necessary part of the diet of wild dogs. They are a **source of nutrients and fiber** and also supply the body with necessary **vitamins**. Carnilove contains a natural composition of **fruits and herbs rich in anti-oxidants**, which support natural **cell protection**, **boost the immune system**, and prevent premature aging.

#### CRUSTACEAN SHELLS AND CARTILAGE EXTRACT

The shells of marine crustaceans and cartilage extract are natural sources of **chondroprotectives**, substances that have a **positive effect on the condition and mobility of the joints, tendons, and ligaments**. Together with other active substances, they guarantee **long-term mobility and flexibility in the joints** of all dogs, including those regularly subjected to increased physical stress.

**WILD-ORIGIN MEATS 70%**  
**FOREST FRUITS, VEGGIES & HERBS 30%**

**GUARANTEED COMPOSITION CONTAINING NO CHEMICALS, PRESERVATIVES, OR COLORANTS**  
Comprehensive food forms the basis of daily nutrition for dogs. We understand that the quality and nutritional composition of dog food has a direct impact on overall health and wellbeing. The diet of wild dogs contains no chemical substances and no artificial additives, both of which can accumulate in the body and cause serious health problems. Carnilove contains the **highest-quality ingredients** and maintains excellent digestibility and usability through careful processing.

# for Puppies

• GRAIN-FREE • POTATO-FREE •  
**Salmon & Turkey**

High-quality nutrition rich in essential amino acids, vitamins, and minerals is critical for healthy growth in puppies.

Carnilove Puppy has been formulated to closely resemble the original natural food of dogs and their genetic ancestor, the wolf, whose diet primarily comprises muscle, offal, and bone obtained from prey balanced with the correct proportion of wild berries, vegetables, and herbs.

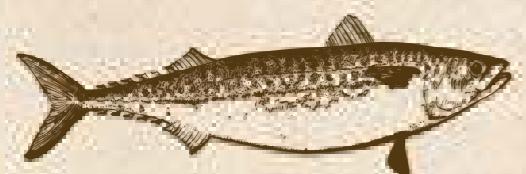

All of these components are critical for development of strong bones, joints, and muscles. Salmon meat and oil provide the omega fatty acids required for a healthy coat and skin as well as proper development of the nervous system.

## Salmon & Turkey

To support proper growth, large-breed puppies require a diet rich in essential nutrients, proteins, and fats.

Carnilove Puppy Large has been formulated to closely resemble the original natural food of dogs and their genetic ancestor, the wolf, whose diet primarily comprises muscle, offal, and bone obtained from prey balanced with the correct proportion of wild berries, vegetables, and herbs.

Large breed puppies need these ingredients in order to develop strong bones, joints, and muscles. Salmon meat and oil provide the omega fatty acids required for a healthy coat and skin as well as proper development of the nervous system.

Lamb & Wild Boar  
Salmon  
Reindeer  
Duck & Pheasant

To stay fit, adult dogs of all breeds need a diet rich in high-quality proteins combined with sufficient levels of essential fatty acids.

The Carnilove range for adult dogs has been formulated to closely resemble the original natural food of dogs and their genetic ancestor, the wolf, whose diet primarily comprises muscle, offal, and bone obtained from prey balanced with the correct proportion of wild berries, vegetables, and herbs.

Meat and fat from wild fowl and fish deliver all the vital nutrients adult dogs require to maintain optimal physical condition and a healthy immune system.

## Lamb & Wild Boar

Lamb and wild boar are the perfect combination of quality, highly digestible, usable proteins rich in natural nutrients. Lamb is an excellent source of trace elements such as selenium, iron, zinc, B vitamins, and unsaturated fats, while wild boar is packed with proteins yet contains little fat, making it ideal for maintaining optimum physical condition without the risk of increased blood cholesterol levels.

### Lamb & Wild Boar

GRAIN-FREE & POTATO-FREE FORMULA  
FOR ADULT DOGS OF ALL BREEDS

**COMPOSITION:** wild boar meat meal (30%), free-range lamb meat meal (25%), yellow peas (20%), chicken fat (preserved with tocopherols, 10%), chicken liver (3%), apples (3%), tapioca starch (3%), salmon oil (2%), carrots (1%), flaxseed (1%), chickpeas (1%), hydrolyzed crustacean shells (a source of glucosamine, 0,026%), cartilage extract (a source of chondroitin, 0,016%), brewer's yeast (a source of mannan-oligosaccharides, 0,015%), chicory root (a source of fructo-oligosaccharides, 0,01%), yucca schidigera (0,01%), algae (0,01%), psyllium (0,01%), thyme (0,01%), rosemary (0,01%), oregano (0,01%), cranberries (0,0008%), blueberries (0,0008%), raspberries (0,0008%).

# Salmon

Salmon is a good source of highly digestible proteins. It's easy to digest and has anti-inflammatory properties. It is also rich in omega-3 unsaturated fatty acids, which have a positive impact on mental development, the cardiovascular system, and metabolism (they reduce blood sugar levels). In addition to helping prevent degenerative eye disorders, salmon and its fat improve the quality and appearance of hair and skin.

## Salmon

**GRAIN-FREE & POTATO-FREE FORMULA

## Reindeer

Reindeer meat has unique properties. It is one of the best sources of digestible proteins and has a favorable composition of amino acids. Because reindeer live on wild berries, the meat is exceptionally rich in natural antioxidants and contains little fat, but the fat it does contain is unsaturated and very beneficial. The content of omega-3 unsaturated fatty acids in reindeer meat is similar to that of fish.

## Reindeer

**GRAIN-FREE & POTATO-FREE FORMULA  
FOR ADULT DOGS OF ALL BREEDS**

**COMPOSITION:** reindeer meat meal (28%), wild boar meat meal (22%), yellow peas (20%), chicken fat (preserved with tocopherols, 9%), duck meal (6%), chicken liver (3%), apples (3%), tapioca starch (3%), salmon oil (2%), carrots (1%), flaxseed (1%), chickpeas (1%), hydrolyzed crustacean shells (a source of glucosamine, 0,026%), cartilage extract (a source of chondroitin, 0,016%), brewer's yeast (a source of mannan-oligosaccharides, 0,015%), chicory root (a source of fructo-oligosaccharides, 0,01%), yucca schidigera (0,01%), algae (0,01%), psyllium (0,01%), thyme (0,01%), rosemary (0,01%), oregano (0,01%), cranberries (0,0008%), blueberries (0,0008%), raspberries (0,0008%).

## Duck & Pheasant

Duck is an ideal source of proteins and is rich in polyunsaturated fatty acids (PUFA), which reduce blood cholesterol levels. It's a fantastic source of niacin (vitamin B<sub>3</sub>), which plays an important role in metabolic processes within the body and also helps to lower blood cholesterol levels. Duck contains vitamins A and C as well as important minerals such as iron, calcium, and selenium, while pheasant is an excellent source of vitamin B<sub>12</sub>, phosphorus, and selenium. The combination of duck and pheasant creates a dietetically balanced and nutritious food containing all the essential amino acids.

## Duck & Pheasant

**GRAIN-FREE & POTATO-FREE FORMULA
